  Troubleshooting

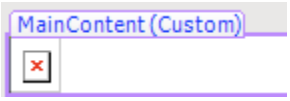
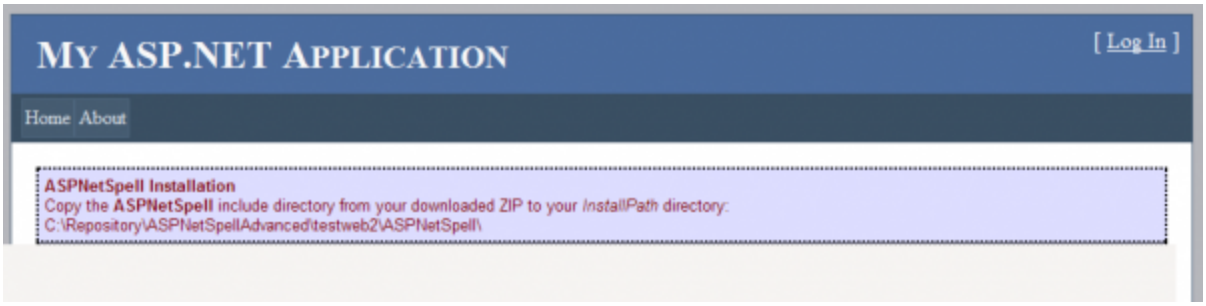
  - 1.1 ASPNetSpell Include Folder
  - 1.2 Do you have the latest release?
    - 1.2.1 Hello World
    - 1.2.2 DLL Version
  - 1.3 Works on Development But Not On Your Live Server?
  - 1.4 De-Bugging Tools
  - 1.5 Still Stuck?

ASPNetSpell Include Folder

The most common mistake is not forget to drag-and-drop the ASPNetSpellInclude include folder that you downloaded into the root (top level) of your website.

This results in the following errors:





In such a case - please re-read the Installation Guide

Do you have the latest release?

We are constantly upgrading this software. If you downloaded APSNetSpell more than a week ago - please:

- Download the latest release.
- Clear your browser cache and try again.

Hello World

We have free Hello World Projects for ASP.Net 1,2,3,3.5&4 - MVC2 - MVC3 and Razor. Download them and see if they help you get ASPNetSpell working...

DLL Version

There are 3 versions of the ASPNetSpell DLL depending on your ASP.Net version. Make sure you download the right one...

If you receive compiler errors about a "missing reference" - you have installed the wrong version. Remove ASPNetSpell from your toolbox and /bin folder - and then reinstall using the Installation Guide. This time, so not use the "Ajax enabled dll".

Works on Development But Not On Your Live Server?

Try this in your web.config:

SourceCode:

```
<location path="ASPNetSpellInclude" >
   <system.web>
     <authentication mode="None" />
     <authorization>
       <allow users="*" />
     </authorization>
```

```
  </system.web>
 </location>
```

De-Bugging Tools

Debugging Scripts

- Browse to ~/ASPNetSpellInclude/debugging-test-scripts/Test.aspx
- Browse to ~/ASPNetSpellInclude/debugging-test-scripts/Test-Instalation.ashx
- Browse to ~/ASPNetSpellInclude/debugging-test-scripts/Test-Server-Ajax.aspx

These scripts should help identify any major issues.

Still Stuck?

If you are still stuck - please [Special:Contact|Contect Us for support] - we will be glad to help.

```
Be prepared to show a URL or a Hello-World project to illustrate the issue clearly.
```
